Intellicheck Mobilisa Receives Contract from Major Telecommunications Company

IDN To Provide Thousands Of Driver License Readers To Telecom Branch Store Locations

Port Townsend, WA – June 22, 2009: [Intellicheck Mobilisa, Inc.](http://www.intellicheck.com) (NYSE Amex: IDN), a global leader in identity and wireless security systems, has received a contract from a major telecommunications company to provide driver license reading technology and equipment to help branch stores improve their customers' shopping experience. The drivers license reading technology will speed up new account applications, reduce errors in data entry, and validate the authenticity of the ID card.

Intellicheck Mobilisa completed a successful development project, and has already booked \$1.13M in new orders in Q2 under this contract. As a preferred vendor, Intellicheck Mobilisa could receive an additional \$3M to \$4M in further equipment orders over the next thirty-six months under this contract.

"We are focused on the pursuit of large retail outlets to incorporate Intellicheck Mobilisa's patented technology to enhance productivity, deter fraud, and reward customer loyalty," says Steve Williams, Chief Operating Officer for Intellicheck Mobilisa. "We were competitively selected based upon our proven value in software, hardware and customer support."

Intellicheck Mobilisa's ID-Check patented technology can scan driver licenses from all fifty U.S. states. This same technology is in use at several Fortune 500 retail stores for instant credit-card applications and fraud prevention at merchandise return centers.

About Intellicheck Mobilisa

Intellicheck Mobilisa is a leading technology company, developing and marketing wireless technology and identity systems for various applications including mobile and handheld wireless devices for the government, military and commercial markets. Products include the Defense ID system, an advanced ID card access control product currently protecting over 50 military and federal locations. ID-Check is a technology that instantly reads, analyzes, and verifies encoded data in magnetic stripes and barcodes on

government-issue IDs from approximately 60 U.S. and Canadian jurisdictions to determine if the content and format are valid. For more information, visit our website at www.icmobil.com.
