

California Marine Corps Base Awards Contract to Intellicheck Mobilisa

Marine Corps Air Ground Combat Center Twentynine Palms Joins the List of Defense ID Users

PORT TOWNSEND, WA – September 22, 2010 -- [Intellicheck Mobilisa, Inc.](#) (NYSE AMEX: IDN), a global leader in access control and wireless security systems, received a contract from Marine Corps Air Ground Combat Center Twentynine Palms in California, to provide them with the Defense ID® access control system. The value of the contract is approximately \$200,000 for equipment, software, installation, training and warranties.

Utilizing Intellicheck Mobilisa's patented ID reading technology, Defense ID quickly scans various forms of IDs, such as driver's licenses, military IDs or passports, and instantly compares the data to over 100 "bad guy" lists. Marine Corps Air Ground Combat Center Twentynine Palms is the world's largest Marine Corps base. It is the premier training facility in the world for Marine operations and draws military personnel from all over the world for combined arms exercises. Each year roughly one-third of the Fleet Marine Force and Marine Reserve units—some 50,000 Marines in all—participate in the base's training exercise program. These training exercises involve every weapons system in the Marine Corps' arsenal, from small arms to attack aircraft.

"We are very pleased to provide Twentynine Palms with the Defense ID system," said Dr. Nelson Ludlow, CEO of Intellicheck Mobilisa. "As a leading training post for Marine units preparing for their tours overseas, we are proud they chose Defense ID for screening their visitors and to be assisting them in protecting our troops."

About Intellicheck Mobilisa

Intellicheck Mobilisa is a leading technology company, developing and marketing wireless technology and identity systems for various applications including: mobile and handheld wireless devices for the government, military and commercial sectors. Products include the Defense ID system, an advanced ID card access control product currently protecting over 80 military and federal locations, and ID-Check, patented technology that instantly reads, analyzes, and verifies encoded data in magnetic stripes and barcodes on government-issue IDs from U.S. and Canadian jurisdictions for the financial, hospitality and retail sectors.
