

FOR IMMEDIATE RELEASE

Intellicheck Mobilisa and Leading Mobile Solutions Retailer Sign Enterprise License Agreement

IDN to Provide Velocity Checking in Pay-Per-Swipe Model

Port Townsend, WA – February 15, 2011: [Intellicheck Mobilisa, Inc.](#) (NYSE Amex: IDN), a global leader in identity and wireless security systems, has launched a new enterprise license agreement with a leader in wireless and mobile solutions retailer, with more than 6,500 locations worldwide.

This license agreement provides the retailer with Intellicheck Mobilisa's patented and proven ID-Check software, to be utilized in the processing of mobile and wireless phone activations. This agreement delivers velocity checking thru a pay-per-swipe contract model, in addition to an enterprise license with Intellicheck Mobilisa. This software solution will help streamline the cellphone activation process for their customers, while also reducing fraudulent transactions.

"Our ID-Check technology has been proven time and again to reduce fraud, streamline the customer experience, and provide a safe and secure application for collecting and processing sensitive data," said Dr. Nelson Ludlow, Chief Executive Officer for Intellicheck Mobilisa. "This industry leader recognized the benefit of our software, and we are excited to add them to our growing list of customers."

Intellicheck Mobilisa's ID-Check software is in use at other leading major telecommunications companies, as well numerous Fortune 500 businesses nationwide. This patented technology helps reduce errors in data entry, while validating the authenticity of the ID card to reduce fraud. ID-Check scans driver licenses from all fifty US states, Canada, Puerto Rico, in addition to forms of the Mexican ID card. ID-Check has many applications, including instant credit-card applications, loyalty enrollment, fraud prevention, as well as POS with check acceptance, and access control at distribution facilities.

About Intellicheck Mobilisa

Intellicheck Mobilisa is a leading technology company, developing and marketing wireless technology and identity systems for various applications including: mobile and handheld wireless devices for the government, military and commercial sectors. Products include the Defense ID system, an advanced ID card access control product currently protecting over 80 military and federal locations, and ID-Check, patented technology that instantly reads, analyzes, and verifies encoded data in magnetic stripes and barcodes on government-issue IDs from U.S. and Canadian jurisdictions for the financial, hospitality and retail sectors.
